## Automated Mass Encapsulation using Generator

AGM made by Droplet Generator (On-chip Biotechnologies) with the average diameter of 80 micrometer.

## Phase contrast image of AGM

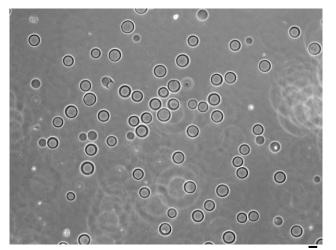

Agarose beads

50 µm

Left : Just after produced by Droplet Generator

Cell Encapsulation Reagent (AGM<sup>™</sup>) distributor <u>TOYO Corporation</u> One Technologies Company

50 µm

Right: Excluded the agarose beads with the diameter less than 30 micro meter filtered by cell strainer
